

MERCO TAPE – TECHNICAL DATA SHEET

Merco M217 series Safety Grade Photoluminescent Tape – (Glow in the Dark)

Merco's M217 Safety Grade Photoluminescent Tape, commonly referred to as 'Glow in the Dark' tape, features a non-radioactive chemical light source (we hope...at least that's what they tell us) incorporated into a flexible vinyl tape. Merco's M217 tape glows in total darkness after exposure to artificial or natural light. Three to ten seconds of light exposure is all that is normally required to re-charge the product.

Merco's M217 Safety Grade Photoluminescent Tape is ideal for general, light industrial use, graphics and markings, vehicle logos, safety kits, homeowners (putting around the toilet so your husband has no excuse), schools, arts and crafts and applications *not* requiring critical end usage. Yes, we have longer rated product for those applications, so please inquire.

We stock **Merco's M217 Safety Grade Photoluminescent Tape** in 1" and 2" and 5- and 10-yard rolls. Other sizes, lengths and grades available on application. Please inquire.
