

# MERCO TAPE – TECHNICAL DATA SHEET

## Merco M515 series MOPP Strapping Tape

**Merco M515 MOPP Strapping Tape** is a high performance, low cost alternative to filament strapping tape. Don't let this tape's appearance fool you: you cannot break it by hand, whether trying to tear it or stretch it to break. Can't be done.

**Merco M515 MOPP Strapping Tape** features an acrylic adhesive to offer a quick, sure stick on a variety of surfaces while assuring both a long-lasting hold and UV resistance. And the extruders put something in the film to make its carrier super strong. Again, be careful: trying to break this by hand will require a lot of Band-Aides.

To properly use **Merco M515 MOPP Strapping Tape** start this on the pallet, pull very taut and keep winding around, top to bottom. Your pallets will hold up better in transit and you will use much less pallet wrap.

We offer **Merco M515 MOPP Strapping Tape** in **Black** (the most traditional and popular color), **White** preferred for food and similar 'clean' applications and **Clear** for those with a sense of humor, looking to have the pallet hold as if by some unseen, magic force. We stock this in 12mm and 18mm and can cut 9mm and 24mm on request.

Film, overall thickness:	2.2 mil, 3.0 mil
Tensile Strength	100 lbs./in width
Elongation	44%
Adhesion to Steel	39 oz./in width

Case packing: 9mm/192 rolls 12mm/144 rolls 18mm/96 rolls 72mm/72 rolls
